

RELEVANT NEWS

February 2024

Love is in the air!

It's one of my favorite months of the year. Filled with sweets, fun activities, and hopefully academic success. This month there are a couple items to pay attention to:

1. Count day is February 14- this is mandatory attendance for all in person learners. We encourage virtual students to attend but it is not mandatory.
2. All left over edgenuity courses from the first semester need to be completed by February 28th. Any courses not completed will be issued a failing grade.
3. Parent teacher conferences are this month, February 28/29! Please be on the lookout for teacher communications. We will also be hosting in person parent education meetings during this time if you missed our January sessions.

As we reflect on the end of the semester there are many students who will have to complete classes during that 30 days extension. This is a great time to sit down with your student to discuss work habits and their at home learning space. Multiple studies have shown the benefits of students working in family spaces with an adult or family member present rather than alone in bedrooms. Even small changes like a working space can help students work towards and be successful with their academic goals.

We are excited to see everyone on count day and parents at the end of the month for conferences. As always please feel free to reach out to me with any questions! Thank you for choosing Relevant Academy.

From the Classroom

We had so much fun with our pre-algebra final project! Students made their own "Go Fish" cards, creating pairs of equations with tape diagrams and/or algebra tiles. Then we played Go Fish and solved the equations.

We practiced writing, speaking, listening to, representing, reading, and thinking math! All the work we did this past semester lead up to developing strong concepts of variable, expressions and equations and culminated in this fun final project.

Relevant Academy students have the opportunity to participate in Eaton RESA's Career Preparation Center their junior and senior years. This is an amazing hands-on experience for students and we have multiple students currently participating this year!

Students will learn transferable skills, earn high school credit, and have an opportunity to earn college credit upon completion of the program.

Different programs include aviation, business, construction, game design, welding, and many more!

Enrollment is open for the 2024-25 school year. Just scan the QR code and reach out to Leah if you have any questions!
